ABOUT US

ICT Misr is an enthusiastic IT consultancy firm and system integrator with headquarters in Egypt. It is committed to leverage its clients with the "Edge of Tomorrow" in information and communication technology. We offer businesses a wide range of solutions in HW infrastructure (compute, storage & network), cloud and virtualization, business continuity, security, systems management, data and information management, and business intelligence and advanced analytics.

OUR VALUES

At ICT Misr, our values represent the cornerstone of our business. Starting from recruitment of talents to handling client projects, we always set our sights on values:

- Client's interests come first
- Teamwork toward the benefit of all stakeholders
- Work with professionalism and integrity
- Work hard and focus on details to deliver high quality

CEO Statement

MOHAMED EL-MOFTY
CEO AND CO-FOUNDER

Going through a new era of technological advancements and digital innovation, ICT Misr preserves its placement as a leading system integration service provider shaping Egypt's digital future.

At ICT Misr, we are devoted to become a trusted partner to all of our clients through fulfilling their requirements with the top-notch solutions and services. The challenges and opportunities that lie ahead demand our commitment to excellence, and strategic vision.

Through the coming years, I look forward to a future where ICT Misr redefines what it means to be a leading technology company in Egypt and beyond. Our experts are continuously pushing the boundaries of what is possible, they work and learn to offer the industry best combination of innovative, cost effective, technology-based solutions.
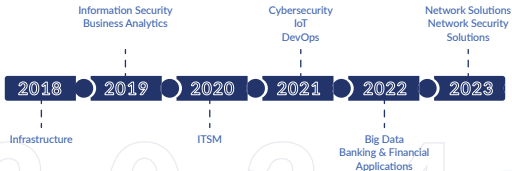

MISSION & VISION

MISSION

To empower our clients by delivering the latest ideal technology software solutions and hardware tools to support them through every step of their digital transformation journey.
Our teams are committed to provide the industry's best practices for more efficient operation management, greater customer service, productivity, and cost savings.

VISION

To be recognized as a world-class system integrator holding a fundamental part of our client's success.
Our experienced teams and highly motivated industry professionals continuously develop to be the best in their field.

TECHNOLOGIES

We pursue IT innovation based on our belief in the infinite possibilities of ICT technology. This pursuit, teamed up with our rich experience in the field, enabled us to put the latest cutting-edge technologies into action. We offer a wide range of solutions that support strategic decision making and optimize day-to-day operations.

TECHNOLOGIES

Hardware Infrastructure

HW infrastructure with scalable computing power is what your business needs. As partners of Dell technologies, Lenovo, Nutanix, and Oracle, we have it all in top- rated solutions; from computing nodes, processors, to various storage solutions.

Cloud and Virtualization

Save your space area and hit the Cloud. As a Dell and VMware partner, we bring agile cloud computing and virtualization solutions that help businesses to scale up, without sacrificing time or security.

Security

At ICT Misr, we help our customers address their concerns about critical security challenges in today's modern IT Infrastructure: Extended Perimeter, Evolving Cyber Attacks, and Data Protection Regulations.

Business Continuity

Implement a wide business continuity to protect your business from potential disasters. ICT Misr is a Platinum Partner of Veritas, the leader in data protection and disaster recovery technologies.

TECHNOLOGIES

Business Intelligence and Advanced Analytics

Analyzing and reporting big data is big deal. ICT Misr deploys solutions in Business Intelligence, Data Warehousing, and Advanced Analytics for data-driven businesses to thrive. From Machine Learning, to BI Dashboards, our technologies will make your business stand out in the crowd.

Data and Information Management

Forget about your data's vulnerability. We provide cutting-edge solutions for your data and information management. Because your business deserves the best, our solutions have it all: Master Data Management (MDM), data quality, and privacy and security solutions.

Systems Management

Take control of all devices on your network. Our Management technology introduces solutions of endpoint monitoring, APM monitoring, and analytics. It will bring you the peace of mind; your IT Team can centrally find, provide, deploy, update, and troubleshoot endpoint devices within your network, keeping your system secure against cyberattacks.
